Dennis L. Hamilton, President

February 15, 1995

Dear Harold;

I am currently reading your book, CASE OPEN with glee. I was suprised at all the media hype for Posner's book, as well as the lack of it when Robert Groden's book came out, as well as yours. What more evidence is needed to proclaim a very biased media. Thank god there are writers like yourself that will someday be heard by everyone, and the masses will finally understand what has and is being done to us.

I am a gun collector, inventor, target shooter, and medical technologist that works in the department of Pathology here at the hospital. I have interest in the case thru my interest in firearms and forensics. I have enclosed copies of two articles that I did last year.

I have great appreciation for your work, and would like to have copies of all of your books, personally autographed, if possible. Let me know how much I should send.

with best wishes,

- Neal
